

Emergency Evacuation Signal

What is the signal for an emergency evacuation of a structure for your department?

- **Under what conditions is it called?**
- **What takes place after companies are evacuated?**

An emergency evacuation is underway at this incident in which 3 firefighters were killed after a roof collapse. Air horns are being used and companies are completing a PAR to ensure that all members are accounted for.

Review department procedures for emergency evacuation of an incident.

1. Who can call for an evacuation?
2. How does the evacuation order get transmitted via radio or other method?
3. How does your department ensure that all members have evacuated from the hazard zone?
